

# FAN COIL TWIN / TWIN AIR HANDLER

NEW

## FAN COIL TWIN 12k E 18k

Condaria propone i nuovi fan-coil modello TWIN, con potenzialità nominale di 12.000 e 18.000 Btu/h (3.000 e 4.500 kCal/h).

Le caratteristiche principali sono:

- Doppio ventilatore centrifugo ad alta prevalenza
- Possibilità di climatizzare due o più ambienti diversi grazie alla doppia mandata
- Dimensioni:

**Twin 12K:** 600mm X 290mm X 250mm.

**Twin 18K:** 600mm X 290mm X 250mm.

- Batteria di scambio termico in rame / alluminio
- Possibilità di asservire il fan-coil a controlli manuali od elettronici
- Bacinella per il drenaggio della condensa in acciaio inox
- Silenziosità ed assenza di vibrazioni

## TWIN 12k & 18k AIR HANDLER

Condaria's new air handler series aptly named the "Twin" features two high pressure ventilators mounted on a single low profile water coil. The line consists of a 12,000 and 18,000 btu models that are well suited for special cooling or heating tasks where their twin high efficiency ventilators can direct cooling separate ambient or under a windscreen where the cooling needs to be evenly distributed through more than 3 grills.

- 12,000 and 18,000 btu models both with twin high pressure centrifugal style ventilators
- Easily able to cool more than 1 ambient or serve up to 6 grills
- Low profile 4 row cooling coil for maximum moisture removal

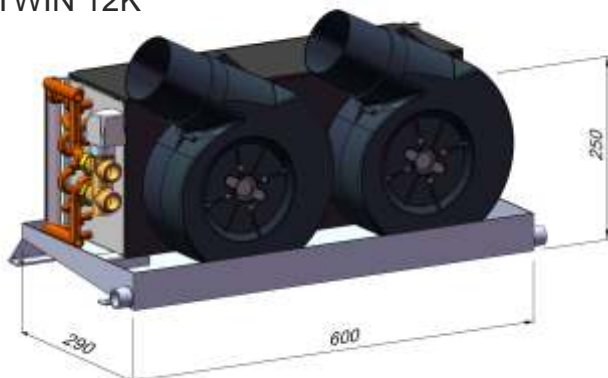

- Dimension:

**Twin 12K:** 600mm X 290mm X 250mm.

**Twin 18K:** 600mm X 290mm X 250mm.

- Can be connected to mechanical or digital thermostats
- Stainless drain pan with dual condensate discharge points
- Silent vibration free operation
